## Year 2: Week 3, Day 4 <br> Adding 5 numbers

Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. Start by reading through the Learning Reminders. They come from our PowerPoint slides.

2. Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)!
Check the answers.

3. Finding it tricky? That's OK... have a go with a grown-up at A Bit Stuck?

4. Think you've cracked it? Whizzed through the Practice Sheets? Have a go at the Investigation...

Add 5 single-digit numbers, using number facts to help.

that make 10 ... add 10, 10 and 3 ...

$$
10+10+3=23
$$

## Learning Reminders

Add 5 single-digit numbers, using number facts to help.

Let's try this one.
How can we change the order to make it easier?
Are there any number facts that can help?

## Practice Sheet Mild <br> Adding using number facts

Can you spot any pairs to 10 or doubles that will help you add the numbers?

| Add these <br> numbers | Pairs to 10 | Doubles | Other facts | Answer |

## A Bit Stuck? Spot the 10

## Work in pairs

Things you will need:

- A set of number shapes, e.g. Numicon ${ }^{\circledR}$
- A set of sum cards
- A pencil

## What to do:

- Choose a sum card.
- Find the number shapes to match.
- Which two shapes go together to make 10 ?
- Now add on the other number.
- Write the answer to the sum.
- Do the same for as many sums as you can.

## S-t-r-e-t-c-h:

Use the number shapes to help you to work out $6+3+4+1$.
Can you see a pair to 10 ?
Now work out $5+3+2+7$.

## Learning outcomes:

- I can add three single-digit numbers, spotting a pair with a total of 10.
- I am beginning to add four single-digit numbers, spotting a pair with a total of 10.
